MPIC/TSSG/RED-1942-69 3 December 1969

	MEMORANDUM FOR: Chief, Technical Services & Support Group, MPIC	
25X1	ATTENTION : PS/TSSG	
	SUBJECT : RED Monthly Report on Significant Events (November 1969)	
	A. Significant Items of Interest for November 1969	
25X1 25X1	fiber-Optics Viewer - A study contract was awarded to determine the feasibility of providing a Fiber-Optics Viewer with a measuring accuracy of 2.5 micrometers plus 0.005% of the distance traveled.	
25X1	2. Advanced Stereo Rhomboids, Model II - A briefing was presented to IEG on the status of the contract to develop prototype advanced stereo rhomboids. The briefing stressed the scheduling problems involved in attempting to provide operational instruments by 1 January 1971.	
25X1	3. High Precision Stereo Comparator Program - Three people from visited on 13 and 14 November 1969 to investigate latest request for a delay in acceptance tests on the correlation.	25X 25X
25X1 25X1	feels that the two companies have reached a common understanding and that will have the correlator ready for acceptance tests in January 1970.	
25X1	Project Manager will visit the week of 8 December to see if the three-week strike at caused, in any way, a delay in the optical schedule. still tentatively plans to start the optical acceptance tests at on 12 January 1970.	25X 25X 25X 25X
25X1	Recon Photo Reproducing Material - On 12 November 1969, representatives of presented their new approach to a proposed program for the development of a positive-to-positive recon photo

reproducing material. It is expected that a formal, multiple-phased proposal will be received by the Center in the near future.

High Speed Dry Silver Processors - The Special Projects Processing Facility (SPPF), Westover, Mass., received two High Speed, Dry Silver Processors on 3 November 1969 and has completed acceptance tests on the delivered items. Indications are that the processors performed acceptably and that the formal acceptance papers will be signed in the near future.

An extensive testing program lasting from 6 to 12 months has been scheduled for these processors. SPPF has agreed to provide copies of this data to NPIC at key points during the testing program. This information will be used to establish specifications for the performance of future compacted roll and paper processors.

6. Automatic Stereo Scanner - On 26 November, was briefed on the current status of this project. He approved solicitation of a proposal from for completion of the project. Furthermore, he directed RED to establish additional coordination with IEG for the purpose of subsequently briefing him on the current operational requirement for this system.

- 7. Image Comparison Microstereoscope On 18 November, after a delay of more than a month, expenditures for September and October were finally obtained. They appeared to the Project Officer to be in excess by _______-thus, threatening an additional overrun. Subsequently, the _____Administrator has stated that the cost figures appear to be correct; however, he categorically stated "there will be no further overrun." A meeting at NPIC has been scheduled for 4 Becember, in which _____ will present a detailed cost and progress analysis to the Contracting Officer and the Project Officer.
- 8. Color Vision Tests Revised color vision test will be implemented in the Center in response to a request by IEG. The personnel to be tested will be selected by the Human Factors Section of RED on the basis of their scores from previous vision tests.
- 9. SO-242 Evaluation RED personnel have proceeded with the evaluation of the SO-242. The planning document, requiring human factors consideration for color imagery exploitation, has been initiated.

20.	completed an analysis of the materials
	currently used and proposed for the Readliner Machine. A final report was distributed.
21.	Mensuration Study - The draft final report of the Mensuration Study has been received and is being reviewed. It is expected that approval of this draft report will be given early in December. A summary presentation of the work
	under this contract was presented at the CCB meeting for
22,	Defocussed Imagery - A final memorandum report on Defocussed Imagery for IAS was prepared and distributed.
23.	Image Analysis Support - The first Image Analysis Support proposal was received and rejected. An acceptable proposal has been received and is being evaluated. A
	fabrication of the fixtures for the analog program are approximately 80% completed; it is anticipated that the optical benches will be completely set up in late December.
